30 MAY – 5 JUNE 2022

The role of artisanal salinas in ensuring sustainable food systems (online event)

3 June 2022 11:00 CEST

organised by:

The **sustainability** of **food systems** is an important prerequisite for **achieving** not only **food** and nutrition security but also social, economic and environmental sustainability in the Mediterranean sea. The **MedArtSal project** aims at promoting the sustainable development of the artisanal salinas by providing concrete support on economic, environmental and governance issues. Addressing common challenges in four Mediterranean regions (Italy, Spain, Lebanon and Tunisia), is promoting development of a sustainable and adaptable management model fostering the territorial valorization of an important man-made coastal ecosystems.
